THE CITY OF LOS ANGELES
2400 Temple Street, Suite 200
Los Angeles, CA 90026
SANCTIONED
10/10/2010

The first step in making a hypothesis is to identify the variables of interest. For example, if you are interested in the relationship between exercise and weight loss, you would identify "exercise" and "weight loss" as the variables. Next, you would formulate a statement about the relationship between these variables. For example, you might hypothesize that "increased exercise leads to increased weight loss."

FROM ANALYSIS OF THE ATTACHED
TOP LISTS, THE FOLLOWING
NOTES WERE OBTAINED:
1. THE FIRST LIST IS A
LIST OF THE NAMES OF THE
SUBJECTS WHOSE NAMES
WERE ON THE TOP LIST.
2. THE SECOND LIST IS A
LIST OF THE NAMES OF THE
SUBJECTS WHOSE NAMES
WERE ON THE TOP LIST.
