Figure 1 is a line graph showing the change in the number of individuals in the population of the common reed (*Phragmites communis*) over time. The x-axis represents time in years from 1960 to 1980. The y-axis represents the number of individuals from 0 to 100. The graph shows a sharp increase from 1960 to 1965, followed by a gradual decline and then a sharp drop around 1975.
