

The three basic accounting reports to be prepared are the statement of assets, liabilities and net worth, the statement of income, and the statement of cash flows. The statement of assets, liabilities and net worth is the balance sheet. The statement of income is the income statement. The statement of cash flows is the cash flow statement. The balance sheet is prepared at the end of the accounting period. The income statement is prepared for the accounting period. The cash flow statement is prepared for the accounting period.

1. *Protein* (100g)  
 2. *Carbohydrate* (100g)  
 3. *Fat* (100g)  
 4. *Water* (100g)  
 5. *Minerals* (100g)  
 6. *Vitamins* (100g)  
 7. *Enzymes* (100g)  
 8. *Hormones* (100g)  
 9. *Antibodies* (100g)  
 10. *Cells* (100g)

## AREA STATEMENT

ESTABLISHED 1888  
EST. 1888  
EST. 1888

**Background:**

While the literature suggests that the use of the Internet for health information is increasing, little is known about the use of the Internet for health information in the United States. The purpose of this study was to determine the use of the Internet for health information in the United States.

**Methods:**

A cross-sectional survey of 1,000 U.S. adults was conducted. The survey was conducted via the Internet. The survey included questions about the use of the Internet for health information, the use of the Internet for health information in the past 12 months, and the use of the Internet for health information in the past 6 months.

**Results:**

The results of the survey indicate that the use of the Internet for health information is increasing. In the past 12 months, 44% of respondents used the Internet for health information, up from 34% in the past 6 months. The most common use of the Internet for health information was to search for health information (44%), followed by using the Internet to communicate with a health care provider (34%).

**Conclusion:**

The results of this study suggest that the use of the Internet for health information is increasing. This finding has implications for the development of health information resources and the delivery of health care services.

| SCHEDULE OF EXPENSES |               |        |
|----------------------|---------------|--------|
| Line                 | Item          | Amount |
| 1                    | TRAVEL        | \$0.00 |
| 2                    | FOOD          | \$0.00 |
| 3                    | ENTERTAINMENT | \$0.00 |
| 4                    | RENT          | \$0.00 |
| 5                    | UTILITIES     | \$0.00 |
| 6                    | INSURANCE     | \$0.00 |
| 7                    | OTHER         | \$0.00 |
| 8                    | TOTAL         | \$0.00 |
