

Architectural floor plan of a retail and warehouse space. The plan is divided into a **RETAIL AREA = 763.07 SQ.MT** and a **GOODOWN AREA = 386.87 SQ.MT**.

RETAIL AREA: Includes a **TIME WINDOW** and a **WET AREA**.

GOODOWN AREA: Includes a **STAFF LOCKER ROOM**, **RESTROOM**, **KITCHEN**, **OFFICE**, **STORAGE**, **ELECTRICAL ROOM**, **UPS & SERVER ROOM**, and **STAIRS**.

The plan shows various rooms, corridors, and structural elements like columns and walls. Dimensions are provided for various sections and overall areas. A north arrow is located in the bottom right corner.

1. **Identify the problem.** The first step is to identify the problem. This involves understanding the symptoms and the context in which they are occurring.

2. **Define the problem.** Once the problem is identified, it needs to be defined in terms of its scope and impact. This helps to clarify what is being addressed.

3. **Set priorities.** Not all problems are equally urgent or important. It's important to set priorities based on the severity of the problem and the resources available.

4. **Develop a plan.** A clear plan of action is needed to address the problem. This should include specific steps to be taken, who is responsible for each step, and a timeline for completion.

5. **Implement the plan.** The plan is then put into action. This involves coordinating resources, communicating with stakeholders, and monitoring progress.

6. **Evaluate the results.** Once the plan has been implemented, it's important to evaluate the results. This involves comparing the actual outcomes with the expected outcomes and identifying any areas for improvement.

7. **Communicate the results.** Finally, the results of the problem-solving process should be communicated to all relevant stakeholders. This helps to ensure transparency and accountability.
